Trial Task – Junior Web Developer

Based on the PSD/PNG file:

1. **Frontend**: Create a one-page website using flexbox. Do not use front-end frameworks (e.g., Bootstrap). Make sure that it displays properly in different screen sizes.
2. **Backend**: Build the website in a custom WordPress theme. Preferably use ACF (Advanced Custom Fields). Do not use Elementor or similar Page Builders.
3. **Version Control:** Push the code to a GitHub repository. Let there be at least two commits in repository for this project. Share GitHub repository with agonkarakashi@gmail.com
4. **Database transfer**: Send WordPress database as a zip file to agon.karakashi@gdsgroup.com
5. **Bonus**: Host website to a VPS of your choice.

Additional information: Design does not need to be pixel perfect implemented in frontend. Also, you can change colors & text. Do not focus a lot in slider functionality. Also, ignore the maps section.

Deadline for task completion is Monday ,18.12.2023, 12:00 PM.
